S. No.	Project Requirements	
	Requirement/ Feature	Completed
1	Automatic Whatsapp Messenger-This opens a whatsapp web tab in the browser and sends a text to a number mentioned in the code and at a particular time set by the user in 24 hour clock.	Pass
2	Search for a youtube video- This takes a youtube video title from us in an input box and automatically opens a youtube tab in the browser and plays the video.	Pass
3	Movie Details- This takes an audio input from us about the movie name. Then it recites all the details about that movie using information from imdb database.	Pass
4	Greetings - This greets the user in any language chosen by clicking on a button.	Pass
